

WORLD WAR I
MIDGET GLIDERS
 BY RAY MALMSTRÖM

BRISTOL MONOPLANE 1917

With this tiny glider, built very quickly from scraps, you can have a lot of indoor flying fun. Small size—big performance. Banks, loops, three-point landings! Have a "Western Front" dog-fight in your club room!

These super little World War I Midget gliders are very easy and quick to make, and fly surprisingly well. Further models in this series will appear from time to time. Once you've built one and got the idea, you'll be able to design and build your own—a whole squadron costs only a couple of shillings!
