

I USED A SKYANGELS 35MM TO POWER MINE BUT I BELIEVE THE ARTTECH 30MM UNIT WOULD ALSO FLY THIS SET  
 THE 35MM UNIT WAS WRAPPED AROUND THE SHROUD WITH 1 LAYER OF 5mm TREE FOAM TO AIDE MOUNTING (SNUG FIT)

PART "TR" IS 1 LAYER ADDED IN FRONT OF HORIZ TAIL PART THEN SANDED TO BEVEL ON FORWARD EDGE TO NOT ROUND SIDES THIS WILL FORM THE "TAIL RAMP"

TAIL TIPS "SWEPT" UP 1/2" AFTER GROOVE CUT THEN GLUED IN PLACE

I ADDED THIS 1/2" PLY HANDLE TO AIDE LAUNCHES (WORKS GREAT)

ONE LAYER FOAM ADDED HERE THEN SANDED DOWN AND ROUND TO ADD LOWER BELLY CONTOUR

F-86 SABER "BOX FUSE"  
 DESIGNED AND DRAWN BY
